# CONTENTS

This MOST COMPLETE AND CONVENIENT EDITION contains the following major divisions viz.:

	Pages
<b>COMPLETE INSTRUCTIONS</b> For Use of the Code.....	IV-XIV
<b>KEY</b> For Quick Reference to Most Used Sections .....	1-2
<b>THE COMPLETE PHRASE CODE</b> .....	3-242
<b>COMMODITIES</b> —Coal, Copper, Cotton, Corn, Iron, Oil, Steel, Wheat, etc., are alphabetically arranged throughout the Code.	
<b>CURRENCIES</b> —All domestic and foreign—the units, Dollar, Cent, £, Franc, Peso, etc., are in alphabetical order throughout the Code. SEE KEY, PAGE 2.	
<b>GEOGRAPHICAL NAMES</b> —Countries, Places, Ports, Ranges of Ports, Continents, Islands, Oceans, Seas, Rivers, etc., may be found, each in its alphabetical order, throughout the Code.	
<b>NUMERALS</b> —From 1/64th to 5,000,000.....	131-141
For use also with Dollars and Cents—Decimals—Foreign Currencies—Quantities—Weights, Measurements, etc. SEE KEY, PAGE 2.	
<b>STERLING</b> —From 1/32d to £10,000,000....	194-204
<b>ONE MILLION CYPHERS</b> .....	243
(First Series)—4 letters to each half-cypher, for interlocking phrases from other Public and Private Codes with phrases and words from the COMPLETE PHRASE CODE, in the same message .....	
	244-250
(Second Series)—5 letters to each half cypher, which permit one half-cypher to be used from the COMPLETE PHRASE CODE and the other half-cypher of the same ten-letter word to represent the first ONE, TWO, or THREE figures of a sentence, not exceeding 210,000, taken from any Private or Public Code.....	
	251-252
<b>PRIVATE SUPPLEMENT</b> —With over 2,000 five-letter half-cyphers for the insertion of SPECIAL PHRASES required, FIRM NAMES, ARTICLES OF MERCHANDISE, SPECIFICATIONS, PRICES, TERMS, and other private data, peculiar to your specific business....	
	253-301
<b>TELEGRAPH CYPHERS IN TERMINATIONAL ORDER</b> ....	
For checking and correcting errors made in transmission of messages—avoiding many extra charges for repeating cablegrams .....	
	303
<b>POSSIBLE TRANSFORMATIONS</b> of Telegraphic Signals.....	306
<b>SEE ALSO KEY</b> for quick reference to most used classifications of the Code.....	Pages 1-2

The Code words have been certified by the Telegraph Administrations as conforming to the International Regulations

[Bentley, E.L.]

**BENSINGER'S**  
**SPECIAL EDITION OF**  
**COMPLETE PHRASE CODE**  
**(NEARLY 1000 MILLION COMBINATIONS)**

(With a difference of at least 2 Letters in each Half Code-Word)

11945

**1921 REPRINT OF FIRST EDITION**

Telegrams can be expressed *verbatim* with a minimum saving of 50%

By combining Two Phrases in one word a great saving is effected over the  
Deferred Message tariff

Any two Code Words herein (having 5 letters in each) can be joined together,  
either before or after one another, and be telegraphed as ONE WORD of 10  
letters. The user, therefore, compiles his own Phrases *verbatim*, if those in  
the Code are not applicable, with a minimum saving of 50 per cent.  
(See Specimen Messages herein.)

# PREFACE

**T**HIS "COMPLETE PHRASE CODE," containing nearly 1,000 million combinations is compiled upon an extremely simple system to meet the universal demand for a Telegraph Code capable of transmitting economically almost any commercial or general telegram in the precise phraseology of the draft message.

In every business telegrams have to be despatched, dealing with a great variety of subjects (sometimes outside the ordinary scope of the business), which no public Code can adequately transmit with accuracy and economy. Unsuccessful efforts have hitherto been made to meet the requirements, but in most instances the code words have been compiled with only a one-letter difference between each, which entails great risk of misinterpretation. Other books have adopted two and three-letter cyphers which, when united, make a phrase. This, however, renders it almost impossible to discover the correct meaning of the mutilated word, because the code words are not "ready made," as in this book, but are "built up" to meet the requirements of the message. There cannot, therefore, be a code of the complete cypher words with which to compare the mutilated cypher, neither can the possible telegraphic transpositions be avoided.

In this work every care has been exercised to eliminate telegraphic similarities and to give at least a two-letter difference between each of the half-cyphers.

## How to Use Terminational Order of Cyphers

Should any of the "Telegraph Cyphers" be mutilated in transmission, the error can generally (though, of course, not invariably) be rectified by reference to the "Terminational Order of Telegraph Cyphers," found at the end of the Code. For example, the message "flurj" ("in exchange for" "azoft" ("bill of lading for goods per") might be mutilated in transmission in two places, thus, "blurjexoft." To detect this you would divide the word into "blurj" and "exoft," and by turning up the Terminational Order the first part of the cypher will be found in alphabetical order backwards, commencing with "j"; you then find that "blurj" is not in the Code, but there is a cypher "flurj" which will give the correct reading. Treating the second half (also mutilated) and working backwards in the terminational order from "t", you find there is a cypher "azoft," but not "exoft." It will thus be observed that in a code word of ten letters you can find a mutilation in four different ways, namely, from the first to the fifth letters, from the fifth back to the first, from the sixth letter to the tenth and from the tenth back to the sixth. These terminational orders have been found invaluable, and frequently avoid the delay of repeating messages. To further assist the discovery of telegraphic mutilations a list of possible substitutions is given at the beginning of the Terminational Order. This Code must, therefore, not be confused with other systems which give only a one-letter difference between the code cyphers, with all the consequent dangers.

## Scope of Vocabulary and Phrases

The vocabulary will be found very complete as regards commercial and general telegrams, and the examples show its extraordinary scope in telegraphing verbatim messages.

Thousands of the most useful phrases in daily use (whether of a prefix or suffix character) will be found classified under the subject word of the sentence, any two of which can be joined together. The Book is, therefore, a double code. Taking the above example, you would turn up the word "Exchange," and find "in exchange for." The selected phrase could then be attached to almost any commercial word, such as "receipt," "documents," "cash," or anything else, in one word.

## Use of Supplement

A further important feature of the Code is the Supplement, containing upwards of 4,000 blank lines (with code words), in which users can insert special sentences or lists of words, persons, steamers, goods, &c. Particular attention is directed to this facility, as such sentences or words once written in the Supplement automatically become part of the whole Code, and can be joined on as half-words to everything else in the Book. Example:—If "Peter Robinson" is inserted in the Supplement you could express in one word "Request Peter Robinson," "Consult Peter Robinson," or couple on to the name any of about 30,000 words and phrases. You

## PREFACE

could also reverse it, and say "Peter Robinson requests," i.e., any addition in the Supplement can be put before or after any phrase in the Code and be united in one word. If steamers' names, or lists of goods or ports, are inserted in the Supplement, any two can be coupled together in one word. Where there are ranges of ports, or ranges of goods, &c., as half-cyphers, any two of such ranges, can be coupled in one word. You could, therefore, give a rate and port in one word, the price or quantity of any goods (including the name) in one word, &c., &c.

A further facility will be found under the word "Article." Merchants can have a numbered list of articles and refer to them by the Phrase Code, provided they do not exceed four thousand; for example, under "Numerals" will be found "381," which can be suffixed to the word "Article No." Again by using the same cypher, but joining it on to "Article No. 1,000 and," the phrase would read "Article No. 1,381."

### General Arrangement of the Code

As regards the general construction of the Code it is alphabetically arranged throughout, but such phrases as "We shall have," "We shall not be," will be found under "We" (i.e., under the first word), "if we shall" is placed under "If." All other phrases, such as "if required," are under the subject, in this instance under "Required."

The Code will be found exceedingly complete in ringing changes between the pronouns and auxiliary verbs. Under "Telegraph" will be found a large number of useful sentences, such as "Telegraph if you can." Figures and Fractions are under "Numerals"; £ s. d. will be found under "Sterling." The foreign currencies are very complete, namely, the extensive range of figures under "Numerals" can be coupled on to Roubles, Francs, Dollars, etc., etc., and be telegraphed as one word. Under many subjects, such as Francs, will be found sentences, thus, "(—) Francs and 25 cents," so that you could say 391 francs and 25 cents, or, \$681.25 in one word.

Purchasers or intending purchasers should take the most difficult and unusual message they have had to transmit (one incapable of being coded to any extent by other existing Codes) and it will be found that this Code can transmit it verbatim, with a minimum saving of 50 per cent. Some businesses necessarily require technical additions, but these can be inserted in the Supplement, also any sentences solely applicable to the particular trade.

Resolutions of Boards and questions of policy can be transmitted in precise phraseology.

### Interlocking With Other Codes

In most instances the Phrase Code can be mixed with other Codes, particularly those containing dictionary words, which very largely differ from the artificial words used in this Code. This, however, requires care; but messages compiled from this Code (even if other Codes were in general use) would be at once detected. To prevent any confusion the first half of the first cypher could be "coloc," meaning this "Complete Phrase Code."

### Code Language

As regards the cyphers, every care has been exercised to comply with the following rules of the last Telegraphic Convention, which came into force on the 1st July, 1904:—

"Code language is composed (a) of real words not forming comprehensible phrases, and (b) of combinations of letters having the appearance of real words."

"(b) The combination of letters (which must also be within the limit of ten letters) must be "pronounceable according to the usage of one of the above-mentioned languages." (Note the languages referred to are English, French, German, Dutch, Italian, Spanish, Portuguese or Latin.)

"Combinations formed by the running together of *bona fide* words are prohibited."

(Note—This refers to such single words as "wearenot.")

### Use of Half-Cyphers Separately or Combined

Purchasers of this Code should particularly note that the half-cyphers can be used alone, or any two can be joined together, before or after one another, as each half-word is pronounceable by itself, and, therefore, any two are pronounceable when combined.

### Completeness and Economy

The completeness of the Code, as contrasted with all other Codes, is obvious, for whereas a huge Code under the ordinary system would only contain 200,000 sentences, this Code contains hundreds of millions of sentences in a small compass. Its cost is covered very rapidly by reason of the great economy it effects.

An examination of the many Examples (immediately following this) will justify the title given to the Code.

# HOW TO USE THE COMPLETE PHRASE CODE

The following hints having been widely appreciated, it has been decided to embody them here, with the object of obtaining the best results by avoiding needless expenditure:—

## MILLION CYPHERS.

Shortly after the Code was published some firms desired to incorporate sentences from their own or other Codes where these were represented by numbers. To meet this demand One Million Cyphers, numbered (to make any combination) from 0 to 999999 were compiled, the code words being composed of two sections of four letters each. These two sections when united convey the above numbers in eight letters, and thus form an immediate distinction from the five or ten letter cyphers used in this book. This small addition was issued to all holders of the Code and bound up at the end of all copies subsequently issued. This facility has been largely availed of.

## JOINING MESSAGES IN MIDDLE OF WORD.

If a Telegram contains two messages on different subjects, one of these can end in the first half of a cypher, and the second message can commence with the last half of the same word. It would not be necessary to send a separate half-cypher to terminate the first subject, but the code words are, nevertheless, designed so that, if needful, they can be used as five-letter words by themselves in a single-word message.

### Example of commencing a different subject in centre of Code word—

Referring to your telegram of yesterday we do not approve..	UGFIK	} UGFIKUGTUC
Referring to your telegram of 23rd.....	UGTUC	
Await instructions before taking further action.....	ADTUR	} ADTURUGEWB
Referring to your telegram of to-day we approve.....	UGEWB	

It will be observed that three subjects (including dates) are conveyed in two words.

## NUMERALS.

Under "Numerals" will be found an excellent Table rising from 1/64th to 5,000,000, each number or fraction being represented by a half-cypher. Any figures rising by units up to 1,000 can be expressed by a half cypher; subsequent amounts will be found to rise by easy gradations.

### Examples—

203,791, viz.: 203 .....	LIUTY	} LIUTYMAFAN
791 .....	MAFAN	
28,361, viz.: 28,000 .....	MOCAB	} MOCABLOSIZ
361 .....	LOSIZ	

such items as 3 9/64ths or 100 1/16th can be given thus:—

3 .....	LECVA	} LECVALANUH
9/64ths .....	LANUH	

## STERLING AMOUNTS.

The Sterling Table is probably more complete than in any other Code and rises

## HOW TO USE THE COMPLETE PHRASE CODE

from 1/32nd of a penny to £10,000,000. This enables such amounts to be expressed as—

£104 : 11/4½, viz.: £104 .....	TIATL	} TIATLSPAGD
11/4½d. ....	SPAGD	

The Numerals and Sterling Tables can be usefully united thus:—

From Numerals, 871 = .....	MAROF	} MAROF8OWYJ
" Sterling, 10/1d. ....	SOWYJ	

showing that the 871 expresses the pounds because it is coupled to 10s. 1d. The object of uniting the two sections is because the Numerals Table rises by easier gradations than the Sterling Table.

### FOREIGN CURRENCIES.

The Currencies of all countries can be stated by coupling a Numeral on to the word representing the currency, thus:—

371 roubles {	371..... LOTYA	} LOTYAPOLEC
roubles .....	POLEC	
791 roubles and 25 kopecks {	791..... MAFAN	} MAFANPOLFO
roubles and 25 kopecks.....	POLFO	
\$10,500 71 cents {	10,500..... MITAN	} MITANBYETZ
71 cents .....	BYETZ	

Measurements can be given thus:—

350	51	19½	4	} viz.:—
LOPWO	LEWER	LEPMO	LEEZT	

and yet be expressed in two words because each of the groups of figures is represented by half a cypher.

### AUXILIARY VERBS AND PRONOUNS.

To simplify the arrangement of the phrases composed of auxiliary verbs and pronouns (which really have no subject word in them) they are placed under the first word of such sentences. For example:—Under "If" will be found "If you have," "If you will," &c. Under "We" will be found "We have," "We will not," &c. Under "Have" will be found "Have not," "Have not had," &c. All the pronouns and auxiliary verbs are fully treated.

### SECTIONAL PHRASES.

Sectional phrases are inserted to facilitate precision in expressing verbatim messages. For example:—"Been any," "Better not be," "That are," so as to make up phrases such as—

There has (have) not.....	UKTAJ	} UKTAJAYENG
been any .....	AYENG	
Those .....	ULZRA	} ULZRAUKKOC
that are .....	UKKOC	

### OFFERS AND PRICES.

Under the word "Offer" will be found an extensive range of sentences, each expressed by a half cypher, so that they can be coupled on to any article inserted in the Supplement (referred to later), or such sentences can be coupled on to prices or any other phrase.

**Example—**

We offer firm c.i.f. shipment by steamer within 1 month.....	NATGY	} NATGYSLASP
2/5½d. ....	SLASP	

Quotations also are a special feature and can be coupled on to prices, list of goods, &c.

# HOW TO USE THE COMPLETE PHRASE CODE

## USE OF SINGLE WORDS.

The following message illustrates the importance of Single Words in the Vocabulary, which render the "Phrase Code" quite unique.

### Examples—

Agreement	hopeless,	conditions	imposed
AHOSB	HOZAS	DAODZ	IDHEL
prohibitive,	compromise	impossible,	negotiations
OKTIG	DABZY	IDIJN	KUEFT
		suspended	meantime
		UDEWL	KAICY

Expressed by ten half-cyphers = five words. It is only necessary to draft the message in the briefest phraseology, and thus ensure a minimum reduction of 50 per cent.

It will be noted that, unlike some Phrase Codes (useless imitations), each word has a separate half-cypher, thus avoiding any ambiguity.

## EXTENSIVE SUPPLEMENT.

The Supplement to the Code is one of its most valuable features. Upwards of 2,000 Blanks are left at the end of the Code, each represented by a half-cypher, in order that users may insert phrases peculiar to their own business: Names of Firms, Companies, Ports and Places, Lists of Goods, &c. Any two of such Supplementary Sentences can be joined together as one word, or, similarly, any one of them can be joined on to any other of the many phrases or words in the Code. Sentences could be inserted, many of which require one or more blanks to be filled up with Figures, Dates, &c. (thereby saving 50 per cent.), and these can be coupled on to the Figures or Sterling amounts, &c., in the Phrase Code in one word, or a series of quotations can follow, each expressed by a half-word, and, therefore, any two can be joined together.

Firms who find the Supplement of 2,000 Blanks inadequate, for example, a Firm not engaged in the Shipping trade, could appropriate for Supplementary sentences, between 200 and 300 cyphers used under the words "Coal" and "Charter," merely deleting the sentences in the body of the Code and inserting the words "See Supplement."

## FIGURE CODES.

Examples taken from a suggested Merchant's Supplement:—

"We offer firm for reply here not later than (—) (date) for (—) tons of (—) (goods) at (—) (price)."

Each blank could be filled up by a half-cypher, but regular stereotyped messages, giving ranges of sentences, periods for reply, quantities, goods, prices, &c., should, of course, be arranged on the Figure Code system and transmitted by the "TELEGRAPH CYPHERS" in one word expressing 10 figures.

### Example—

29	99	9	299	99
Sentences	Prices	Shipments	Articles	Quantities

## INTERMIXING FIGURE CODES AND PHRASES WITHOUT INDICATORS.

Further uses of the Supplement can be made as follows:—

999 of the Blank Sentences with half-cyphers in the Supplement could be reserved for the Figure Codes, namely—they could be numbered from 000 to 999. These could then form the Prefixes (first three figures) of a Figure Code; the remaining half-word being read from a "Telegraph Cypher" book, The range of figures (identifi

## HOW TO USE THE COMPLETE PHRASE CODE

able by the Special Prefix which is taken from the Supplement to the "Phrase Code") could then be as high as—

99929999 or 99919999 or 99999999

It will be noted in the first Example that one of the Sections could be 29 or 299 sentences, articles, &c. The figures can be divided as desired to meet individual requirements.

### UNITING PHRASES WITH EXACT FIGURES.

It is also extremely useful to appropriate some of the words in the Supplement to those sentences which are constantly being used, and which necessarily have to be followed by high figures, for example, one of such sentences can be—"Draft for £ (—), read next half-cypher from the Cypher Book." This, followed by the cypher meaning, say "21684," would show that you are expressing—"Draft for £21,684" in one word.

### MIXING A.B.C. AND OTHER CODES.

Many Firms are using their own private Codes on the whole word system, or such public Codes as the A. B. C., the Western Union and Lieber's Codes, which occasionally contain long and useful sentences. Any one of these can be indiscriminately mixed with the "Phrase Code," as at the end of that book will be found one million Cyphers which transmit any figures not exceeding one million in one word. You, therefore, merely transmit by the Million Cyphers the number of the sentence taken from one of these Codes (whichever the holder uses) instead of the code word which is printed against the sentence. It will be seen, before you translate it, that the code word expressing the number of the sentence contains only eight letters, which immediately distinguishes it from the words in the "Phrase Code," which must necessarily be either of five or ten letters. This is working satisfactorily in every country in the world, and thus further augments the facilities.

### USED AS AN AUXILIARY CODE.

The adoption of this "Complete Phrase Code" does not necessarily disturb existing Private Codes in use. Two Codes can be mixed by merely inserting in both Codes (against half-cyphers) such sentences as:—

Read 1  $\frac{1}{2}$ -cypher from PHRASE CODE and thereafter revert to our own Code.

Read 2  $\frac{1}{2}$ -cyphers from PHRASE CODE and thereafter revert to our own Code.

Read 3  $\frac{1}{2}$ -cyphers from PHRASE CODE and thereafter revert to our own Code.

Read 4  $\frac{1}{2}$ -cyphers from PHRASE CODE and thereafter revert to our own Code.

Until otherwise instructed by a Code Word read from PHRASE CODE.

■ and the reverse for referring from the "Phrase Code" to a Firm's own Code.

Many Firms, on account of its completeness, always use the PHRASE CODE as the basis, and refer to their own Code when necessary by half a word. Others find the PHRASE CODE so explicit in expressing complex messages that they adopt a special Address Indicator for its use, thus avoiding any Index Cypher. Large Banking and Financial Firms are working on this principle.

### REFERRING TO LINES AND SUBJECTS IN LETTERS.

By numbering Letters and also the Lines of the letters or Subjects therein, replies are facilitated, thus:—

# HOW TO USE THE COMPLETE PHRASE CODE

## Letter No. 203.

- 1.—We shall be glad to know by wire whether you have collected the sum outstanding from Mr. Crick. Numbers are given at the end of this letter for your reply.
- 2.—Also please state whether you have shipped the goods ordered in our indent of 31st October (see below).

Yours faithfully.

- 3.—Amount has been collected from Mr. Crick.
- 4.—Amount has not been collected from Mr. Crick.
- 5.—Goods ordered in indent of 31st October have been shipped.
- 6.—Goods ordered in indent of 31st October have not been shipped.

### Message Reads—

Referring to your letter No.....	JELPA	}	JELPALIUTY
203 .....	LIUTY		
3 = amount has been collected from Mr. Crick.....	LECVA	}	LECVALEHUG
6 = goods ordered in indent of 31st October have not been shipped .....	LEHUG		

This gives the number of the Letter and two complete pre-arranged replies in two words, as by turning up Letter No. 203 and reading “3” and “6” you get the replies. This obviates using a large number of temporary code words, which might, by accident, be simultaneously utilized, thus causing confusion.

## BANKS AND INSURANCE COMPANIES.

Banks and Insurance Companies insert in the Supplement, Phrases or Tables suited to their own business. For example, an Insurance Company requires to state, in half a word, the value of Buildings, &c., thus:—

Value, £ or \$.

1,000	2,000	3,000	4,000	5,000	Side Column.
½ Code	Words	go in these Columns.			

plain  
thousands.  
250  
500  
750  
&c.

Consequently “Value £2,750” can be expressed in half a word, the preceding or succeeding half-cypher (joined on to it) being another phrase alluding to the value.

Bankers insert Sentences *re* status of Clients, which can be coupled on to a Name in the Code Supplement in half a word. Similarly, Sentences *re* Telegraphic Transfers, &c., can be coupled to amounts; prices can be given of Stocks or Shares; amounts of Drafts, Remittances, Balances, &c., can be similarly stated.

# SPECIMEN MESSAGES

1. Portions of Merchants' Telegrams.
2. Portions of Shipping Telegrams.
3. Portion of a Shipbuilding Enquiry.

# ONE MILLION CYPHERS.

(8 Letters each with a 2-Letter difference.)

FOR TRANSMITTING ANY FIGURES WITHIN THE FOLLOWING RANGE:

0/9, 00/99, 000/999, 0000/9999, 00000/99999, 000000/999999.

These Cyphers ("First Series") are compiled, with Terminational Order, for use with the "Complete Phrase Code" from which they can be immediately distinguished, as they are shorter in length by two letters in the complete word.

Many firms use Codes having *numbered* sentences, or in some instances, both code words and numbers against each sentence. These One Million Cyphers are specially adapted for indiscriminately mixing such Private Codes (or the chief Public Codes, viz.: A.B.C., Western Union, Lieber's and others) with this "Complete Phrase Code" of about 1000 million phrases and combinations. The numbers standing against the sentences in such Codes are converted into these Cyphers *instead of using the Code words in those Codes*, thus preventing any possibility of confusion arising when mixing such sentences with the "Complete Phrase Code." These facilities ensure a great economy in despatches. The Cyphers also are specially useful for transmitting messages under the Figure Code System, enabling users to state in one word the quantity up to 999 of any of 1000 articles, or to combine any three of 99 sentences or two of 999.

## EXAMPLES.

(Divide the word in half and translate each half.)

ABWE		ACIV
3		6

ACVE		ATEC
8		75

AFOT		AXMO
07		93

AWAC		KA0Z
83		437

AZAD		BIVO
003		022

On page 251 will be found another set of Cyphers ("Second Series") from the "Complete Phrase Code," which enables a half cypher to be used from that Code, and the other half of the same word can represent the first one, two or three figures of the number of a sentence, not exceeding 210,000, taken from a Private or Public Code.

## EXAMPLE.

One Word (ANVDOZWOC8).

One Word (ZYGDOEPJYT).

ANVDO		ZWOC8		ZYGDO		EPJYT	
		020		085			
Sentence from the "Phrase Code."		Being the first 3 figures of a group from the Private or Public Code transmitted by the 2nd series, page 8.		Being the last 3 figures of a group from the Private or Public Code.		Another sentence from the "Phrase Code."	

= Sentence No. 020085  
in Private or Public Code.

This latter enables the user to unite in *two words* one phrase from the "Complete Phrase Code," one phrase from the Private or Public Code, and another phrase from the "Complete Phrase Code."

The two series must be kept distinct, i.e., a half cypher from the 1st series *must not* be joined to a half cypher from the 2nd series or Phrase Code.

Apart from the above facilities any two words or phrases from the "Complete Phrase Code" can be coupled together in one word of ten letters as contrasted with eight letters in this Million Series.

**1st SERIES.**  
**These Cyphers are to be used for**

## TERMINATIONAL ORDER OF 1st SERIES.

### INSTRUCTIONS.

If a mutilated Cypher should arrive reading "ETABMELE," divide the word into "ETAB" and "MELE," and by turning to this Terminational Order and *working backwards* through "ETAB" you find (in the fourth column) that the code contains "ATAB" and similarly (in the seventh column) "NELE." These would give the correct Cypher, viz., "ATABNELE."

## 2nd SERIES.

Divide the figures thus:  
0/641, 01/789, or 179/030,  
viz., always 3 figures in  
the latter part.

*N.B.—If these Cyphers are  
used for this purpose  
they must be cancelled  
in the "Complete  
Phrase Code" supple-  
ment.*

**This page must be used to transmit the first part (0,00 or  
000 to 210) of the number of any sentence in the**

**Code, and thus show that  
a sentence is inserted in the message from that Code,  
for which purpose these cyphers are exclusively re-  
served. Any of these can be used for the second part  
of the number (000/999), the figures in excess of 210  
being found under "Numerals" in the Phrase Code,  
pages 131-141.**

# **TELEGRAPH CYPHERS**

**IN**

**TERMINATIONAL ORDER**

**FOR CHECKING ERRORS OCCURRING IN  
TRANSMISSION OF MESSAGES**

# TELEGRAPH CYPHERS

(LARGE EDITION)

ARRANGED IN

## TERMINATIONAL ORDER

---

If one of the Telegraph Cyphers (of 10 letters) be mutilated in one half of the word, compare that portion of 5 letters with this Terminational Order, in which the complete edition of nearly 1,000 million cyphers will be found *arranged backwards* (alphabetically). The following example (see page 1, first word of column 2), illustrates its use:—If the code word “marba” were received “parba” you would turn up “ba” (in dark type) and working backwards would show that there is a cypher “marba” but not “parba.”

Taking a more intricate case. Suppose a telegram arrives containing the word “Babanubcaf” (mutilated in two places); neither “Baban” nor “Ubcaf” will be found among the cyphers.

In the Initial Order we find ... .. “Babad”

And in the Terminational Order ... .. “Faban”

Likewise we find in the Initial Order ... .. “Ubczf”

And in the Terminational Order ... .. “Abcaf”

These would give the following four combinations:—

Babadubcaf = N instead of D, and F instead of Z

Fabanubcaf = B instead of F, and F instead of Z

Fabanabcaf = B instead of F, and U instead of A

*These transpositions together are not possible telegraphically. (See Table.)*

Babadabcaf = NU instead of DA (in centre of word). If, therefore, the translation reads correctly, this word can be safely adopted, pending repetition, as, according to the Morse Signals, such substitution is possible by an error in spacing.

One of the Telegraph Cyphers (of 10 letters) can, therefore, be examined in four different ways, namely, from the first letter (commencing the first half of the Cypher) to the fifth letter, from the fifth back to the first; from the sixth letter (commencing the second half of the Cypher) to the tenth letter, and from the tenth back to the sixth. These Terminational Orders have been found invaluable, and frequently avoid the delay of repeating messages. To further assist the discovery of telegraphic mutilations a list of “Possible Transformations of Telegraphic Signals” is given at the beginning of the Terminational Order.

# POSSIBLE TRANSFORMATIONS OF TELEGRAPHIC SIGNALS.
